Knightly Feed

- As a student, I want a scrollable feed of club and campus posts that read fully in place, so I can catch up without tapping into separate article screens.
- As a student, I want a For you view showing posts from orgs I follow plus campus-wide announcements, so I see what's relevant first.
- As a student, I want an All campus view with every post published from approved campus sources, ordered newest first , so I can discover clubs and events I don't follow yet.
- As a student, I want to search posts all over campus, so I can find a specific event or organization quickly.
- As a student, I want to filter posts by category (The Arts, Athletics, Music, Academics, Faith, Service, Social, Outdoors), so I can browse by interest.
- As a student, I want to follow and unfollow campus organizations, so I can control which organizations appear in my For you feed.
- As a student, I want to mark a post as a favorite, so I can save an announcement or event to revisit later.
- As a student, I want to view my favorite posts and remove posts from that list, so I can keep useful information easy to find.
- As a student, I want the feed to automatically retrieve published club and campus posts from configured, approved Calvin sources when I open it, so I can catch up without checking separate websites.
- As a student, I want event posts to show the event date, time, location, and any registration link, so I can decide whether to attend and know how to participate.
- As an authorized club representative, I want to submit a post with a title, content, category, and any event details for my club, so students can discover our announcements and activities.
- As an authorized club representative, I want to edit posts belonging to my club, so changed dates, locations, and other details stay accurate.
- As an authorized club representative, I want to mark an event to post as canceled, so students can see that the event will not take place.
- As an authorized club representative, I want to withdraw an outdated post from the feed, so students do not rely on information that no longer applies

Dining and Knight Card

- As a student, I want to see my meal plan in one place, so I know what I have left.
- As a student, I want my remaining swipes and guest passes shown as one dash per meal, so I can understand my balance at a glance.
- As a student, I want to tap my Knight Card to open my student ID full screen, so I can present it quickly.
- As a student, I want the screen brightness to rise automatically when my ID opens, so scanners can read the barcode reliably.
- As a student, I want my previous brightness restored when I dismiss the ID, so I don't have to readjust my phone.

- As a student, I want the ID barcode to scale to fit my screen, so it scans on any device size.
- As a student, I want to see dining hall hours relative to the current time, so I know what's open right now.
- As a student, I want to see today's stations, so I can decide where to eat.
- As a student, I want to view my recent transactions, so I can track my spending.
- As a student, I want dining hours and today's menu to be automatically retrieved from approved Calvin sources when I open Dining, so I can find the latest available information in one place.
- As a signed-in student, I want my meal balances, transaction history, and Knight Card information retrieved from approved university services for my account, so the app shows my own information.
- As a student, I want to select a dining hall and see that hall's hours and menu, so I can compare where to eat.
- As a student, I want a message explaining how to adjust brightness when automatic adjustment is unavailable, so I can still prepare my ID for scanning

Safety

- As a student, I want a one-tap call button to campus safety, so I can reach help immediately in an emergency.
- As a student, I want quick entry points for Safe Walk, reporting an incident, and blue light locations, so I can get the right help without searching.
- As a student, I want to see recent campus alerts, so I stay informed about anything affecting my safety.
- As a student, I want a list of campus phone numbers, so I can contact the right office.
- As a student, I want a quick entry point that opens the official incident-report form, so I can report a concern through the correct campus service.
- As a student, I want a quick entry point that opens an official map or maintained list of blue light locations, so I can find the nearest listed emergency phone.
- As a student, I want saved Campus Safety and emergency contact numbers to remain visible without an internet data connection, so I can find help when online services are unavailable.
- As a student, I want the Safety screen to automatically retrieve alerts from an approved campus source when I open it, so I can read the latest available announcements.

Directory

- As a student, I want to search the directory of students, faculty, and staff, so I can find someone quickly.
- As a student, I want to filter the directory by role, so I can narrow results to the group I need.
- As a student, I want to tap a person's row to open my mail client, so I can email them without copying addresses.

Navigation and Experience

- As a student, I want to swipe left and right between the four tabs, so I can move around the app naturally with one hand.
- As a student, I want the swipe to follow my finger with elastic edges and a spring snap, so navigation feels smooth and responsive.
- As a student, I want to tap the bottom bar to slide to a tab, so I have a clear alternative to swiping.
- As a student, I want light and dark palettes, so the app is comfortable to read in any environment.
- As a web user, I want a top navigation bar, so the app works with a mouse and larger screen.
- As a student, I want a refresh action on the feed, dining, and safety screens, so I can request updated information without reopening the app.
- As a student, I want separate loading, no-results, and request-failure messages, with retry after a failure, so I understand what happened and can try again.

Account and Personal Data

- As a student, I want to sign in through an approved Calvin authentication service, so I can access university information associated with my account.
- As a student, I want to sign out and clear my personal information from the app screen and local cache, so another person using my device cannot view my account details.
- As a student, I want an expired session to hide personal information and ask me to sign in again, so my account data is not shown without an active session.
